## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The patent term adjustment to date is 53 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 53 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

## Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the primary reason for the indication of the allowability of the claimed invention is the inclusion of the limitation, in the combination as currently claimed, that the image forming apparatus includes a first memory for storing an image signal for modulating the first light beam, a second memory for storing an image signal for modulating the second light beam, and memory control means for starting writing an image signal for the first light beam in the first memory before an image signal for the first light beam for previous scanning is read out from the first memory, and starting writing an image signal for the second light beam in the second memory after an image signal for the second light beam for previous scanning is read out from the second memory, and which is not found taught or fairly suggested by the prior arts made of record, considered alone or in combination.

Fukuda et al. (U.S. 5,661,512) discloses a thermal print head control method, which stores the image pulse number data for lines of even and odd numbers into the first and second line memories, respectively, and upon receiving the print start signal the image pulse number data of one certain line is read out of one of the two line memories at the same time that the image pulse number data of next line is written to the remaining memory of the two.

Oh (U.S. 5,901,274) discloses an image forming apparatus comprising first and second line memories for storing input image data to be enlarged/reduced in units of one scanned line, the two line memories alternately perform states 1 and 2, where in

state 1, an image data is read out of the first line memory while an image data is written into the second line memory, and where in state 2, the first line memory operates in an image data write mode while the second line memory operates in an image data read-out mode.

Kwak (U.S. 5,546,511) discloses a high-speed video image printing method and apparatus, in which the digitized pixel data are alternatively written into the two line memories, and the stored pixel data are alternatively read out of the two line memories so as to print the read-out data.

However, none of the prior arts made of record discloses the claimed sequences of writing and reading the image data from the first and second memories, wherein the start of the write-in of an image signal for a first light beam in the first memory is performed before an image signal for a first light beam for previous scanning is read out from the first memory and the start of write-in of an image signal for a second light beam in the second memory after an image signal for a second light beam for previous scanning is read out from the second memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
